

# HOW DO YOU KNOW YOU'RE *REALLY* GETTING THE **BEST** HOTEL RATES?

Our rate auditing technology gives you the edge,  
mastering the hotel rate game to give you the most value over time  
*without you having to lift a finger.*

## Rates change often

Plenty can happen in the time you book a hotel room and your arrival date. A big conference is announced nearby and room rates can rise considerably. If it's cancelled at the last minute, the rate will tumble.

## Daily searches

Our rate auditing technology will keep a watchful eye on your current hotel rate, similar hotel rates within policy, and hotel rates in the nearby area – every day until the moment you check-in. As soon as a lower rate becomes available, we'll send you an email.

## Swap freely

As rates become available, you can instantly swap your reservation at the click of a button... as many times as you want until the day you check-in.

## Maximise value of your preferred rates

Ensure your travelers really are receiving the lowest available rates and use reliable, quantifiable data to leverage your preferred programme.

## Benchmark similar properties

We'll monitor properties within the local area of your preferred choice and analyse the data to benchmark against your current preferred programme.

## Make big savings

We're finding savings on **36%** of bookings – averaging **£28 per night** – just by benchmarking the original property against similar hotels with the local area. By monitoring the same hotel, we're finding savings on **12%** of bookings, representing **£19 per night**.
